

Instructions to create Your Web Page

Computer Centre has designed a template to create PRL user's own web page. The theme of the template is similar to PRL website. The design of theme is responsive. We request you to kindly follow the below steps to create your own page. For any further help, kindly send an email to webadmin@prl.res.in

1. For precautionary measures, backup your `.public_html` directory using below command:

```
cp -r ~username/.public_html ~username/.public_html-backup  
[Kindly replace username with your username]
```

2. Now, extract the "***new_web_template.tar.gz***" tar file using below command :

```
tar -xvzf new_web_template.tar.gz
```

Now there will be (1) "new_web_template" directory and (2) "webscript.sh" shell script.

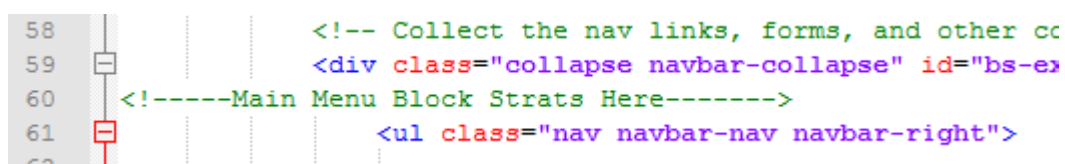

3. Now navigate to `new_web_template` directory. Here you'll find a file named `index.html`. Kindly edit this file to create your new web page using existing page content. You can either open this file using any **framework** or directly edit file using any editor like **gedit** or **vim**.

4. Our ***index.html*** file contains 3 blocks:

- ***Main Menu Block***
- ***Section Block***
- ***And Don't Touch Block***

5. ***Main Menu*** block is used to add new link in main menu of our web page. By default it contains all the menu links that are generally created in a web page. You can add or delete any menu link from this block by following the specified steps in this document. We can delete the menu link that we don't want in our web page. But if we want to add a new link in our menu then it could create the menu to appear in multiple rows in desktop view. So be careful while creating new link. To create or delete a menu follow the below steps.

- . To **delete** a link in the menu go to **Menu block** in our ***index.html*** file. As shown in the image below.

```
58 <!-- Collect the nav links, forms, and other cc  
59 <div class="collapse navbar-collapse" id="bs-e  
60 <!--Main Menu Block Strats Here----->  
61 <ul class="nav navbar-nav navbar-right">  
62
```

- Here you'll find many "" tags closed in <!--Some text-->. As shown in image below for link **Research Interests**:

```

63 <!--Main Menu Research Interests Starts Here-->
64 <li>
65     <a class="page-scroll nav_link" href="#research_interests">Research Interests</a>
66 </li>
67 <!--Main Menu Research Interests Ends Here-->

```

- To delete a menu link go to the "" tag for the link that you want to delete. for example if we want to delete the link "**Research Interests**" then select from "<!--Main Menu Research Interests Starts Here-->" to "<!--Main Menu Research Interests Ends Here-->" and delete it. As shown in image below:-

```

63 <!--Main Menu Research Interests Starts Here-->
64 <li>
65     <a class="page-scroll nav_link" href="#research_interests">Research Interests</a>
66 </li>
67 <!--Main Menu Research Interests Ends Here-->

```

- After deleting link **Research Interests**, If we don't want to display the section **Research Interests** in our web page then we have to delete it also. If we want to only delete the Link but don't want to delete the section then you just delete the link not the **link related section**.
- If you have created a new **Section** but don't want to create a link in main menu then it's ok. But if you want to create it's link in main menu then you follow the next steps.
- Find the position in **Main menu block** where you want to display your new section's link. Like if you want to create link after **Research Interests** link then find **Research Interests Link Tag**.

```

63 <!--Main Menu Research Interests Starts Here-->
64 <li>
65     <a class="page-scroll nav_link" href="#research_interests">Research Interests</a>
66 </li>
67 <!--Main Menu Research Interests Ends Here-->

```

- Then place the following code after the Research Interests link Block

```

<!--Main Menu Some Link Name Starts Here----->
<li>
  <a class="page-scroll nav_link" href="id of the section that the link going to point precedes by # "> Some Link Name</a>
</li>
<!--Main Menu Some Link Name Ends Here----->

```

Note: About Section id and how to create a section will be discussed further in this document. Replace Some Link Name with the name you want to give to your link and replace the id with the id of the section that you want to refer.

6. Create a new section:

- Find the Section Block in index.html file

```

124
125 <!--Section Block Starts Here----->
126
127 <!-- Photo with personal details Section Starts Here. here Section id is "about".

```

- In this block you will find many Sections, like Research Interests Section as shown in below image.

```

151 <!-- Section Research Interests Starts Here. here Section id is "research_i
152 <section id="research_interests" class="contact">
153   <div class="container">
154     <div class="row">
155       <div class="col-md-12">
156         <h3 class="text-left section_h3_1">Research Interests</h3>
157         <ul>
158           <li>Research Interest 1</li>
159           <li>Research Interest 2</li>
160           <li>Research Interest 3</li>
161           <li>Research Interest 4</li>
162         </ul>
163       </div>
164     </div>
165   </div>
166 </section>
167
168 <!-- Section Research Interests Ends Here----->
169

```

- Find the place, where you want to create a new Section. For example if you want to create new **Section** after **Research Interests** Section then just write the code given below in the image.

```

<!-- Section Some Section Name Starts Here. here Section id is "some_section_id" -->
<section id="some_section_id" class="contact">
  <div class="container">
    <div class="row">
      <div class="col-md-12">
        <h3 class="text-left section_h3_1">Some Section Name</h3>
        Write Text what you want to write Here.
      </div>
    </div>
  </div>
</section>
<!-- Section Some Section Name Ends Here -->

```

Note: Replace “Some Section Name ” with the name you want to give to your section and also replace id “some_section_id” with the unique id that you want to give to your section.

7. Add your Publications to the publication Section:

- Find the section named as **Section Publications Starts Here** as shown in the below image.

```

<!-- Section Publications Starts Here. here Section id is "publications" -->
<section id="publications" class="contact">
  <div class="container">
    <div class="row">
      <div class="col-md-12">
        <h3 class="text-left section_h3_1">Publications</h3>
        <ol>

```

- Add your publication details in the tags as shown in image

```

<!------- Section Publications Starts Here. here Section id is "publications"----->
<section id="publications" class="contact">
  <div class="container">
    <div class="row">
      <div class="col-md-12">
        <h3 class="text-left section_h3_1">Publications</h3>
        <ol>
          <li>Publication 1 Details</li>
          <li>Publication 2 Details</li>
          <li>Publication 3 Details</li>
          <li>Publication 4 Details</li>
          <li>Publication 5 Details</li>
        </ol>
      </div>
    </div>
  </div>
</section>

```

- To create a List of complete publications list find the following:

```

<!-------Parent Accordion Starts Here----->

<div class="row" style="margin-top:25px;">
  <div class="col-md-12" style="padding:0px;">
    <div class="panel-group" id="accordion_parent">
      <div class="panel panel-default">
        <div class="panel-heading">
          <h4 class="panel-title">
            <a data-toggle="collapse" href="#collapse_parent">
              <div id="collapse_parent" class="panel-collapse">
                <div class="panel-body">
                  <div class="row">
                    <div class="col-md-12">

```

- In this block you'll find the <!-------Child Accordion Starts Here ----->

```

<!-------Child Accordian Starts Here ----->

        <div class="panel-group" id="accordion_child">

<!--Repeat Only This Part of Child Accordian to create new horizontal bar for every publication year--Starts Here-->
        <div class="panel panel-default">
            <div class="panel-heading" style="background-color:#009bad;">
                <h4 class="panel-title">
                    <a data-toggle="collapse" data-parent="#accordion_child"
                    href="#collapse_child1"><span class="glyphicon glyphicon-filter"
                    aria-hidden="true"></span>Year 1<span class="caret"></span></a>
                </h4>
            </div>
            <div id="collapse_child1" class="panel-collapse collapse in">
                <div class="panel-body">
                    <ul style="list-style:none;">
                        <li>
                            No. Title <br/>
                            Authors<br/>
                            Journal
                        </li>
                    </ul>
                </div>
            </div>
        </div>

<!--Repeat Only This Part of Child Accordian to create new horizontal bar for every publication year--Ends Here-->
    </div>

<!-------Child Accordian Ends Here----->
</div>

```

- To create a publication List for year 2016 then replace **Year 1** by **2016** and also write the publication details for year 2016. To create more publications of year 2016 the just repeat ** Tag in the above** image.
- To create a new year for publication list then write the complete code as shown in image below, but remember to change the in two places, one is the **id attribute** (for example the below image id has **collapse_child1** , to create second year of publication list change id **collapse_child2 as so on**) and other is **href attribute in the below image** (replace the value of href="#collapse_child1" with #collapse_child2 and so on)

```

<!-------Child Accordian Starts Here ----->

        <div class="panel-group" id="accordion_child">

            <!--Repeat Only This Part of Child Accordian to create new horizontal bar for every publication year--Starts Here-->
            <div class="panel panel-default">
                <div class="panel-heading" style="background-color:#009bad;">
                    <h4 class="panel-title">
                        <a data-toggle="collapse" data-parent="#accordion_child"
                        href="#collapse_child1"><span class="glyphicon glyphicon-filter"
                        aria-hidden="true"></span>Year 1<span class="caret"></span></a>
                    </h4>
                </div>
                <div id="collapse_child1" class="panel-collapse collapse in">
                    <div class="panel-body">
                        <ul style="list-style:none;">
                            <li>
                                No. Title <br/>
                                Authors<br/>
                                Journal
                            </li>
                        </ul>
                    </div>
                </div>
            </div>

            <!--Repeat Only This Part of Child Accordian to create new horizontal bar for every publication year--Ends Here-->
        </div>

<!-------Child Accordian Ends Here ----->

```

8. Add your photo on first page: Kindly keep all your photos in the folder img. Kindly modify the below section in index.html file.

For example, replace Link to Photo" with img/yourphotofile

```

</img>

```

9. Add your contact details on first page: Kindly modify the below contents in index.html.

```

<h4 class="text-success">Name</h4>
Designation<br/>
Division<br/>
E-mail: abcd@prl.res.in<br/>
Telephone: +91-79-*****<br/>

```

10. Now, rename your existing .public_html file using command

```
mv .public_html .public_html-old-page
```

11. Now, Rename new_web_template to .public_html using command

```
mv new_web_template .public_html
```

12. Now, change the permission of .public_html directory using command

```
chmod -R 755 .public_html
```
